

**Norbert E. Kaminski, PhD**  
**Professor and Director**  
**Department of Pharmacology and Toxicology**  
**Center on Research for Ingredient Safety**  
**Institute for Integrative Toxicology**  
**Michigan State University**

**Norbert Kaminski** is a professor in the Department of Pharmacology and Toxicology and is the director for the Center on Research for Ingredient Safety and director of the Institute for Integrative Toxicology, at Michigan State University. He holds joint appointments in the College of Human Medicine, Veterinary Medicine and the College of Agriculture and Natural Resources at Michigan State University. Dr. Kaminski joined the Michigan State faculty in 1993. He was also affiliated with the Medical College of Virginia in their Department of Pharmacology and Toxicology from 1985-1999. He received his B.A. in Chemistry in 1978 from Loyola University in Chicago, Illinois, and his M.S. in Toxicology in 1981 and Ph.D. in Toxicology and Physiology in 1985 from North Carolina State University in Raleigh, North Carolina. Dr. Kaminski has served on a number of advisory panels including National Academy of Science/IOM Review of the Health Effects in Vietnam Veterans of Exposure to Herbicides, 1992-1994; US EPA Science Advisor Board-Dioxin Reassessment Review, 1995; National Academy of Sciences IOM Study on the Assessment of the Health Implications of Exposure to Dioxins 2004-2006 and the National Academy of Sciences IOM Study on the Health Effects of Marijuana 2016-2017 and National Academy of Sciences, IOM Committee on Emerging Science on Environmental Health 2017-2021. Dr. Kaminski has also served on peer review panels including US EPA Science Review Panel for Health Research, NIH ALTX-4 Study Section and for NIDA, NIEHS, NIOSH, Wellcome Trust, and American Chemistry Council. Dr. Kaminski has served on editorial boards including as an Associate Editor for the Journal of Pharmacology and Experimental Therapeutics. Dr. Kaminski served as Treasurer for the Society of Toxicology from 2005-2007 and as President 2014-2015.

Dr. Kaminski has trained twenty-four doctoral students, twelve post-doctoral fellows and has served on numerous graduate student committees. He has authored over 170 articles in the peer-reviewed literature as well as review articles, book chapters, monographs and opinion articles. He has co-authored the chapter on Toxic Responses of the Immune System in *The Basic Science of Poisons. Casarett and Doull's* textbook for both the 7<sup>th</sup>, 8<sup>th</sup> and 9<sup>th</sup> Editions. Dr. Kaminski has had continuous research funding from the National Institutes of Health for the past thirty years. He presently serves as the principal investigator for a NIH/NIEHS P42 Superfund Research Program Center, which is in its twentieth-ninth year of continuous funding.
